

# Lab 5: Review

---

Perform an Exploratory Data Analysis (EDA), Data cleaning, Building models for prediction, Presenting results using on the following datasets

## **Titanic**

Using Titanic passenger data to predict which passengers survived the Titanic disaster.

The data has been split into two groups:

- training set (titanic\_train.csv)
- test set (titanic\_test.csv)

For details: <https://www.kaggle.com/c/titanic/data>

You should achieve an accuracy of at least 75%
